ASTM F803 Approved Eyewear Reference List

Updated: Fall 2005

According to the manufacturer, the following brands and companies sell of protective eyewear which meets ASTM F803 impact standards for racquet sports, as required for participation in all USSRA sanctioned events.

PLEASE NOTE: The ASTM standard cited addresses the impact resistance of the tested eyewear **as a unit**. This means that the lens and frame **combination** meets the cited safety standard. For those who must wear corrective lenses, it is **not** acceptable to merely have impact resistant lens material placed in everyday, fashion eyeglass frames. Please use the following list to select a suitable model for your protection.
